

COMPRESSED AIR EQUIPMENT

Office # 1,2nd Floor, Al-Hamd Plaza, 34 Civic Centre, Mustafa Town, Wahdat Road,
Lahore-Pakistan. Cell: **0300-8463763** Tel: 042-35411331
E-mail:shaffaf.lhr@gmail.com www.shaffafeng.com

SHAFFAF owns a whole set of mature production technology standards, from R&D, design to production and assembly, SHAFFAF establish the standard production line supported by technology. SHAFFAF production is checked step by step strictly to ensure that each process in a scientific and standardized seamless docking. As one of the Pakistan's largest air compressor system supplier, SHAFFAF products have won quality improvement, science and technology awards, and a number of product design patents.

Your Companion for Compressed Air Equipment

INDUSTRIAL FILTERS

- * New & Used Air Compressors & Air Dryers
- * Rental Air Compressors Available
- * Spare Parts & Filters For Air Compressors
- * Maintenance & Services For Air Compressors
- * Special Lubricating Oil For Air Compressors

OIL SEPARATOR

Filto manufactures a wide range of separator filters for compressors with different diameters and heights. They are employed from the major constructors of screw and vane rotary compressors to purify and separate the oil for lubrication from the air without these filters the oil would be driven and sent on the main line and on different applications.

OIL FILTER

Protect your compressor, with the right air compressor oil filter, and save money on expensive repairs.

Oil filters are normally only found on bigger compressors, like oil-injected screw compressors. Obviously, they filter the oil to remove any dirt. In other words: they protect your compressor from damages by dirt, sand, pieces of rust, etc. Dust and dirt will damage the filter element, wear the bearings and clog the oil-separator.

AIR FILTERS

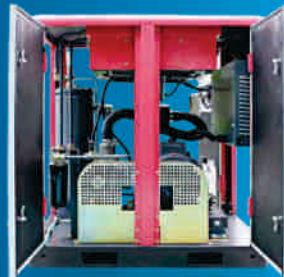

Filto Manufactures Hundreds Of Different Types Of Air Filter For Compressors Built Either With Metal Or Plastisol End Caps. We Use Paper Of About 20-25 Microns And Plate Thickness From 3/10 To 10/10 As Required From The Customer. All Filters Are Compatible With Major Constructors. And We Are Able To Design And Make Custom-made Filters Upon Request.

COMPRESSED AIR FILTERS/LINE FILTERS

Due to the continuous demand for clean, high quality compressed air. YUKA is pleased to introduce a range of coalescing filters, specifically designed to suit most requirements. Our established experience enables us to offer simple, efficient and high quality products at competitive prices. There are four series of elements available for various types of application, depending on the level of filtration required.

TYPES OF COMPRESSORS Drive Systems

- * Belt Driven
- * Direct Coupled
- * VSD (Energy Saving)
- * Oil Free Compressor
- * Low Pressure For Textile Sector

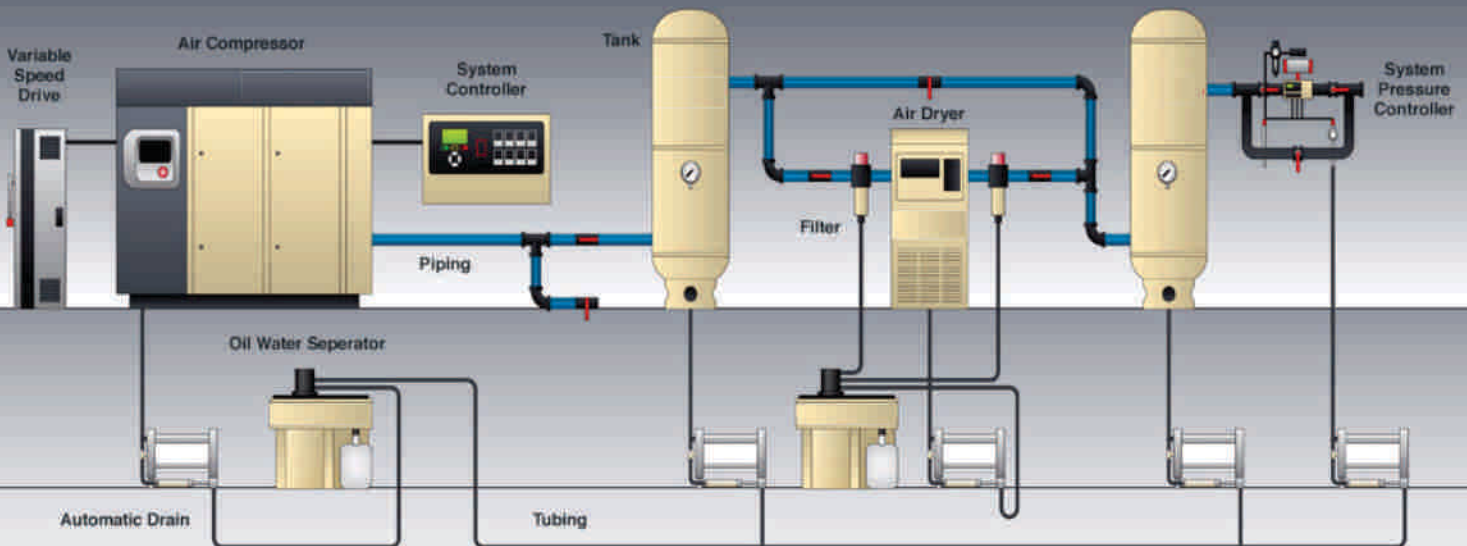

HIGH INLET TEMPERATURE AIR-COOLING REFRIGERATED AIR DRYER

A compressed air dryer is used for removing water vapor from compressed air. Compressed air dryers are commonly found in a wide range of industrial facilities. The process of air compression concentrates atmospheric contaminants, including water vapor. This raises the dew point of the compressed air ...

Complete Compressed Air treatment system

When Speaking Of Air Compressors, Compressed Air Treatment Is A Method That Dehumidifies And Cleans Air Prior To Its Entering The Machines. This Process Usually Involves The Use Of An Air Dryer And Air Filter Beyond The Air Filter Found In An Air Compressor. An Effective Compressed Air Treatment System Lowers The Dew Point Of The Air And Takes Out Particles That May Negatively Impact The Machines.
